

I have a wife and four children and I hold both a Bachelor's and Master's degree in Biology and have been teaching at the high school level for 17 years. Over the course of my career, I have taught a wide range of courses, including Biology, Chemistry, Anatomy and Physiology, and AP Biology. I have taught for two years at Torag high teaching AP Biology and Chemistry. I am passionate about making science engaging, approachable, and fun, with the goal of helping students see its relevance and inspiring them to consider science as a future field of study and profession.
