

My name is Judy Kelin and I have been part of Torah High's math department since its inception. I was born in Brooklyn, New York, and from there moved to New Jersey. I got my undergraduate degree in Secondary Math Education from Rutgers University. After getting married and moving to San Diego, I got my Masters Degree from San Diego State University in Math. I have two wonderful daughters who graduated from Torah High, with the older one being a part of the first graduating class of Torah High. This is my 48th year of teaching math, mostly high school, and I still enjoy it thoroughly.
